

Why ISO 9001 & ISO 45001?

Put quality and health & safety at the forefront of your business

By deciding to implement ISO 9001 and ISO 45001 in an integrated management system, you will be creating a streamlined set of processes that align your quality objectives with practical strategies for health & safety, showing your customers, employees and stakeholders that you take consistency and safety seriously.

With ISO 9001 and ISO 45001 your business can:

- ✓ Clearly define and identify ownership and responsibility for key processes
- ✓ Efficiently allocate resources across the business
- ✓ Quickly identify areas for improvement with regular checks
- ✓ Roll-out improvements through a single, integrated system for maximum efficiency and effectiveness

Principles of ISO 9001 and ISO 45001

Leadership

- Who will set objectives?
- Do you understand the needs and expectations of your staff?

Planning

- How will you achieve your goals?
- What are the risks and opportunities?
- What legal requirements does your business need to abide by?

Support

- Do you have the resources you need to achieve your goals?
- What training will your staff need?

Operation

- Are you giving customers what they want?
- Do you have a focused way of collecting feedback?
- How can you meet your health & safety goals at each stage of your product/service lifecycle?

Evaluation

- How will you measure, monitor, analyse and evaluate your business' performance?

Improvement

- How do you document process reviews and ensure the right improvements are made?

Context of the organisation

- What quality challenges does your business face?
- Who are your interested parties?
- What are the health & safety risks your business faces?

With guidance and support from our expert consultants you will be able to develop and implement a management system that grows with your business and helps you to achieve your quality and health & safety objectives.
