

# Joining QMS Connect

To help you get started on our secure 24/7 online platform, here is an overview of the next steps.

## Signing up

If you're happy to go ahead, we will send along our New Services Form. Once you've filled this out and agreed on your payment plan for the annual licence fee, we can get the ball rolling!

## Setting up your platform

Once you're signed up, we will create a QMS Connect dashboard and log in for you. If you already have a management system with us, and have agreed for us to do so, we will migrate this across for you so that you have everything in one place.

## Gaining access

Once it is set up, we'll send you an email containing a link to the platform. Follow this link and the on-screen instructions to set up your log in.

## Getting to know the platform

You can now start to enjoy the features of the QMS Connect portal! To help you get to know it better, you may like to [watch this video](#) or book a training session with us. You can also talk to us via the platform's support service if you have any other questions.
