

## Copado Sandbox Refresh Steps

To refresh a sandbox follow these steps <https://docs.copado.com/articles/#!/copado-ci-cd-publication/sandbox-refresh> ensure to follow them exactly. Note if you refresh from int sandbox you will still see any Copado stories that have not been deployed to production coming up in your back promotions to get round this you can

1. Create a back promotion but not deploy it
2. Then manually update the promotion record to mark it as complete
3. Note if you do this you must exclude any stories that were deployed to INT after you did the refresh
