

Why ISO 55001?

Protect and enhance your business' assets for a stronger business strategy

Take your business from strength to strength with enhanced asset management. With ISO 55001 you can implement the processes you need to manage your assets across their lifecycle, controlling the associated risks and costs while building value and driving improvement.

With ISO 55001 your business can:

- ✓ Manage expenditure, lower costs and protect asset values
- ✓ Reduce the risks of asset management
- ✓ Stay compliant with legal obligations
- ✓ Drive process improvements across the organisation
- ✓ Improve business sustainability

Principles of ISO 55001

Leadership

- Who will be accountable?
- What areas do your management team need to focus on?

Planning

- How will you achieve your goals?
- What areas do your team need to focus on?

Support

- Do you have the resources you need to achieve your goals?
- How will you document and communicate them?

Operation

- What processes do you need to run a successful asset management system?
- What processes do you need to follow your assets throughout their lifecycle?

Evaluation

- How will you measure, monitor, analyse and evaluate your business' performance?

Improvement

- How do you document process reviews and ensure the right improvements are made?

With guidance and support from our expert consultants you will be able to develop and implement a management system that grows with your business and helps you to achieve your asset management objectives.
