

Why ISO 44001?

Build better relationships for a stronger business

Strengthen your supply chains by implementing ISO 44001, which builds a robust framework of processes designed to develop your business collaborations, helping you to develop effective joint ventures and support your growth plans.

With ISO 44001 your business can:

- ✓ Improve efficiency with mutually beneficial collaborations
- ✓ Increase productivity with better training and relationships
- ✓ Reduce costs
- ✓ Make better decisions
- ✓ Enhance its reputation for a competitive edge

Principles of ISO 44001

Leadership

- Who will set objectives?
- What areas do your management team need to focus on and be involved with?

Planning

- What are your collaboration goals?
- How will you achieve your goals?

Support

- Do you have the resources you need to achieve your goals?
- How will you document and communicate them?

Operation

- How will you facilitate collaborative working?
- How will you identify risks?
- Who will perform key market analysis?

Evaluation

- How will you measure, monitor, analyse and evaluate your business' performance?

Improvement

- How do you document process reviews and ensure the right improvements are made?

With guidance and support from our expert consultants you will be able to develop and implement a management system that grows with your business and helps you to achieve your collaborative business objectives.
