

# Why ISO 9001, ISO 14001 & ISO 45001?

## Dial up efficiency and reduce risks to health & safety and environmental impact

By deciding to implement ISO 9001, ISO 14001 and ISO 45001 in an integrated management system, you will be creating a streamlined set of processes that align your business objectives and implement robust processes that develop the quality, environmental management and health & safety of your business.

### With ISO 9001, ISO 14001 and ISO 45001 your business can:

- ✓ Clearly define and identify ownership and responsibility for key processes
- ✓ Efficiently allocate resources across the business
- ✓ Quickly identify areas for improvement with regular checks
- ✓ Roll-out improvements through a single, integrated system for maximum efficiency and effectiveness

## Principles of ISO 9001, ISO 14001 and ISO 45001

### Leadership

- Who will set objectives?
- Who will manage risks to the business?
- Do you understand the needs and expectations of your staff?

### Planning

- How will you achieve your goals?
- What are the risks and opportunities?
- Does everyone understand their roles?
- What legal requirements does your business need to abide by?

### Support

- Do you have the resources you need to achieve your goals?
- How will you document and communicate them?
- What training will your staff need?

### Operation

- Are you giving customers what they want?
- Do you have a focused way of collecting feedback?
- How can you make your product/service lifecycle more efficient and meet your health & safety goals?
- How will you manage your environmental impact?

### Evaluation

- How will you measure, monitor, analyse and evaluate your business' performance?

### Improvement

- How do you document process reviews and ensure the right improvements are made?

### Context of the organisation

- What quality challenges does your business face?
- Who are your interested parties?
- What are the health & safety risks your business faces?

With guidance and support from our expert consultants you will be able to develop and implement a management system that grows with your business and helps you to achieve your quality, environmental and health & safety objectives.
